Education

Bachelor of Science in Computer Science — XYZ University (2019 - 2023)

Skills

- Python, C++, JavaScript, SQL
- Machine Learning, Deep Learning, NLP
- Web Development, Flask, React
- Git, Docker, AWS

Projects

• AI Chatbot

Developed an AI chatbot using NLP and Flask to automate customer queries.

Integrated with messaging platforms for real-time support.

• Stock Sentiment Analysis and Trading Platform

Built a financial news sentiment analysis tool and trading platform using FinBERT and Flask.

Deployed on AWS with real-time stock news API integration.

Implemented fake news detection algorithms to enhance platform reliability.

Experience

• Software Engineer Intern — ABC Tech (June 2022 - Aug 2022)

Developed a scalable REST API using Flask and PostgreSQL.

Implemented an authentication system, improving security by 40%.

- **ML Research Intern — XYZ Labs (Jan 2023 - June 2023)**

Researched reinforcement learning for automated trading bots.

Optimized LSTM models for better predictive performance.
